

Commons Assembly: Bridging Divides

The Power of YES

Welcome to Sage Community!

NO

the first power word we learn.

We Can Do It!

YES

the most powerful word!

YES

bridges divides...

YES

to including patients in medical decisions and research.

YES

to sharing and contributing personal data to help find new biomedical insights and cures.

YES

to reaching out to hard-to-reach populations
and patients with rare conditions.

YES

to doing bio-medical research in novel, unorthodox ways.

YES

to harnessing new technologies.

YES

to recognizing cultural variations in medicine.
